GANESH LANJEWAR

B.Tech - Artificial Intelligence And DataScience
+918767789113 | maroti.ganesh24@vit.edu | linkedin

EDUCATION

B.Tech in Artificial Intelligence And Data Science — CGPA: 8.97
Vishwakarma Institute of Technology, Pune — 2025-2026

Higher Secondary School Of Education — Percentage:85.45%
OmSatyaSai College, Bhandara — 2023-2024

SKILLS

Programming Languages : Java, Python ,C++
Core Skills/Technologies : OOPS, MERN , Data Structures and Algorithms, MySQL, Problem Solving, MongoDB , React, Next.js ,WebRTC , Scoket.io, Redux

PROJECTS

Smart Dustbin: Automated Waste Segregation and Monitoring System for Sustainable Waste Management *(Nov'24-Mar'25)*

- Designed and developed a Smart Dustbin using Arduino Uno for automated waste segregation.
- Incorporated moisture sensor for dry/wet waste detection, ultrasonic sensor for fill-level monitoring, and alcohol sensor for odor detection.
- System is solar-powered, promoting sustainability and supporting smart city waste management solutions.

Full Stack Real-time Video Calling App *Live* *git-hub* *(Feb'26-Mar'26)*

- Tech: JavaScript, WebRTC, Socket.io, CSS3
- Built a peer-to-peer video conferencing platform using WebRTC for real-time media streaming.
- Implemented low-latency communication with Socket.io for signaling and instant messaging.
- Enabled users to join calls via unique room IDs, supporting seamless one-to-one video sessions.
- Optimized connection handling to maintain stable video quality under varying network conditions.

ProConnect – Full-Stack Professional Networking System *Live* *git-hub* *(Mar'26-Apr'26)*

- Tech: Next.js, Node.js, Express.js, MongoDB, Redux
- Built a full-stack professional networking platform enabling users to create profiles, share posts, and connect with others.
- Implemented secure JWT-based authentication and authorization, ensuring protected user data and sessions.
- Developed real-time features for dynamic content updates and user interactions, improving engagement.
- Designed and integrated scalable REST APIs with optimized database queries for efficient data handling.

ACHIEVEMENTS

- Achieved **1st rank in Impetus** held at Pune Institute of Computer Technology, Pune for Smart Dustbin in the domain of Embedded System
- Published research paper in the high graded journal Elsevier based on the research for smart dustbin project.

CERTFICATIONS

- Applications of AI for Anomaly Detection – NVIDIA
- Fundamentals of Deep Learning – NVIDIA
- Java Certified Foundations Associate : Java Concepts and Features - Infosys Springboard

EXTRACURRICULAR

- Represented district at state level in Volleyball at Amravati District.
- Participated at division level in cricket held at Gadschiroli District, Maharashtra.
